

Indiana Conference on Energy Management

For many years, Indiana companies benefited from low-cost energy. That is especially important in one of the country's leading manufacturing state. Today, Indiana's electricity prices fall in the middle of the pack.

State development and implementation of a comprehensive energy resource strategy is among the goals in the *Indiana Vision 2025* plan. The hoped-for result is Indiana being among the Top 10 states in electricity affordability.

These topics and more will be part of the annual Indiana Conference on Energy Management, scheduled for July 31-August 1 at the Hyatt Regency Indianapolis.

This is Indiana's premier conference on finding affordable and sustainable energy sources for your business, as well as networking with other professionals in the field. The conference will focus on the current state of energy in Indiana, what the future holds and how your business can properly prepare.

Individual registration is \$399 for chamber members, \$199 for government employees and \$499 for non-members. Register online at www.indianachamber.com/conferences or call Nick at (800) 824-6855. Send two or more people and receive a 20% discount!
